

Oliver "The Gentleman"

Deanna Goodwin

Meet Oliver "The Gentleman" as shown with his bowtie. He is the polite project manager that silently attends Zoom meetings but gets right in the camera when he hears other dogs on Zoom.

Best Pet Manager

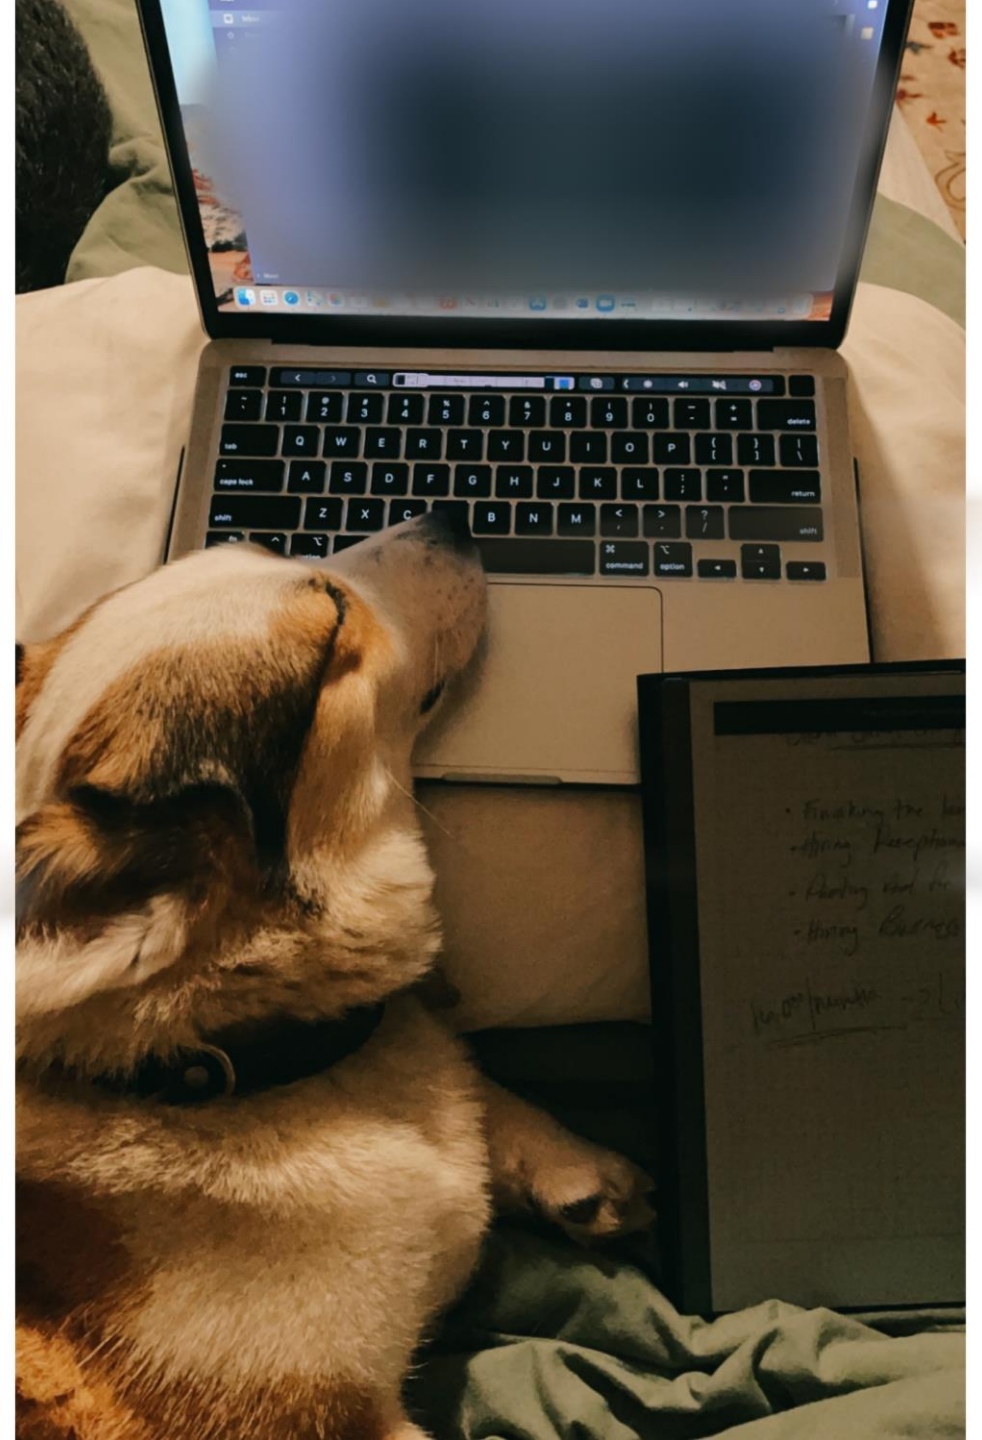

Norman Freeman

Stephany Day

Sharing a photo of my micromanager Norman Freeman who often wakes a the crack of dawn for an early start to the work day! (But then falls asleep o the job.) He expects that I share my lunch with him and barks every time I say “hello” at the start of a new zoom meeting, just so that everyone knows he’s listening!

Best Pet Manager

Lizzy Mustain

Nicole Mustain

Attached is a picture of Lizzy Mustain. One of her best project management skills is adaptability. She has learned to adapt to her team's schedules and the many meetings that occur daily. She takes delight in long walks to reflect on how she can utilize her time during these meetings. She greets her team with kindness and is always inviting them to collaborate with her. If a team member is having a rough day, she shows them support and encouragement. She is always smiling and wanting to share her toys. This helps the team to grow and learn.

Best Pet Skills

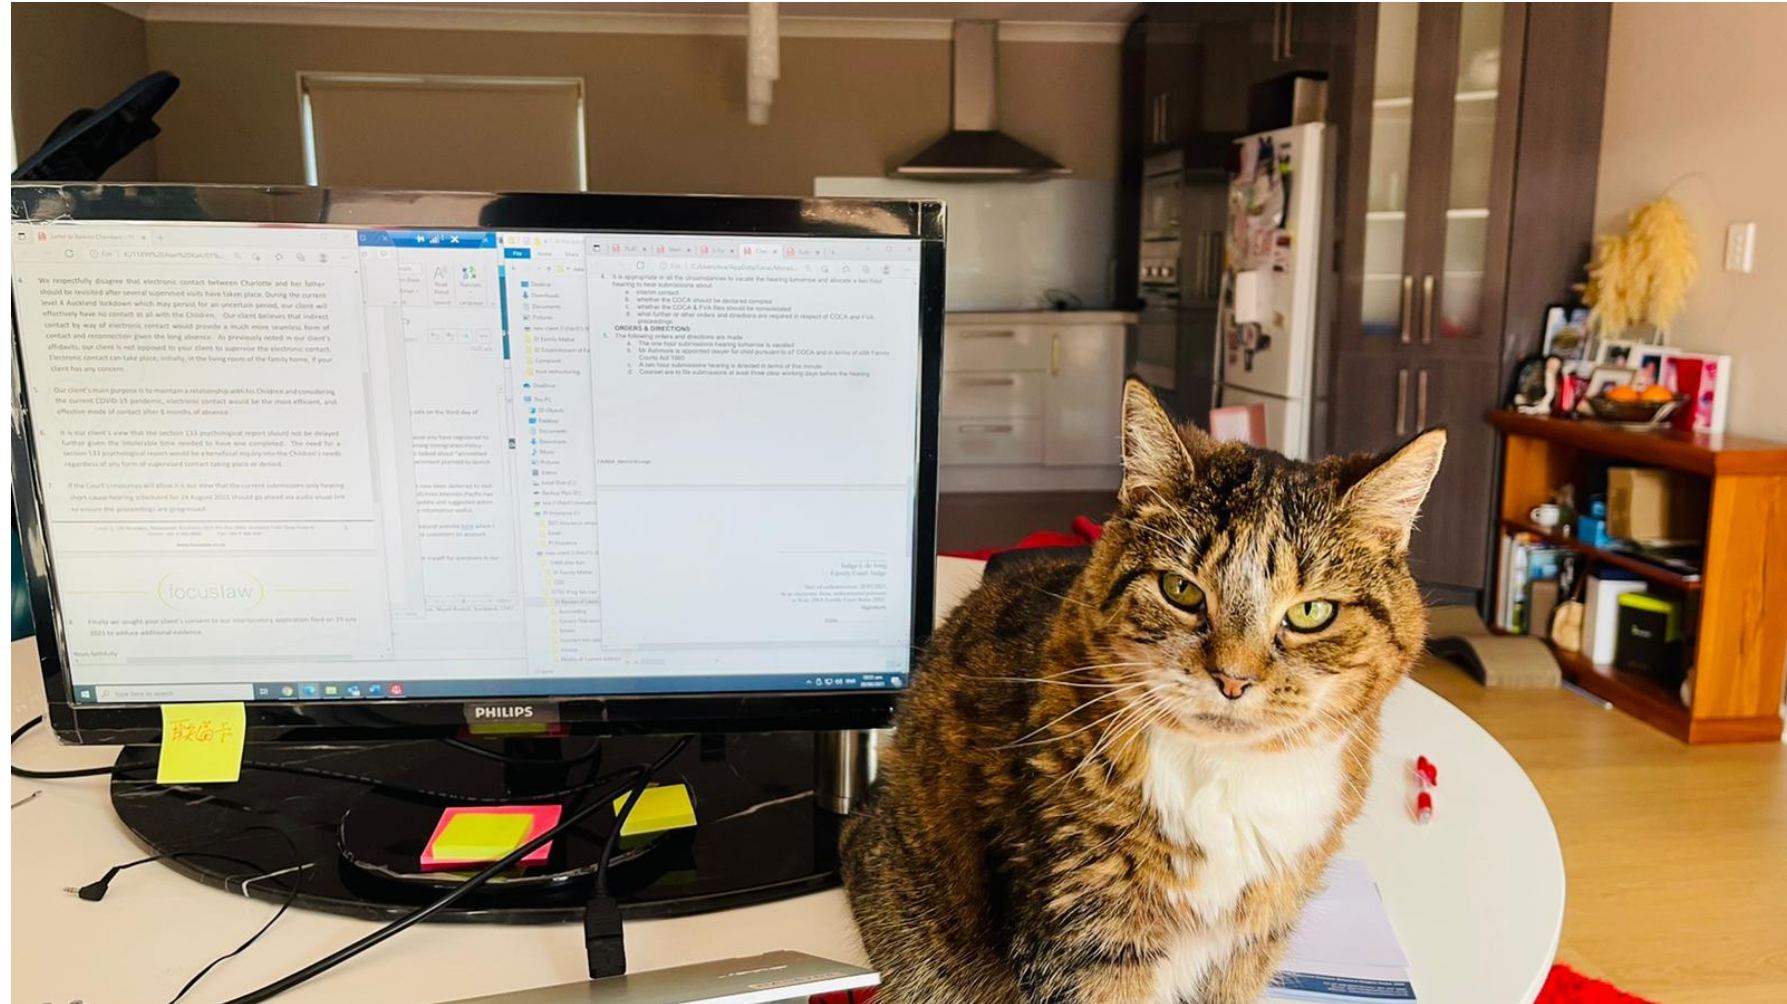

PM Molly

Angel Tse (EC)

Best PET Manager(PM)

PM Molly makes sure that I stay on my tasks while WFM Working From Home. She gave me this mean look when I started to slack off.

Best Showcased Pet

PM Shelby

Chase Pickering

Shelby is a 12 year old black lab and has come quite far in her project management career. Her primary projects include creating training for her owner and developing KPI (Key Performance Indicators) for daily management personnel. The most successful KPI's include: Walks per day, Food Scoops per bowl and Number of Squirrels Sighted.

Like a third-base coach in baseball her signals are easy to understand and should be followed immediately for best success. As a result her Communication, Scheduling and Quality Management skills are second to none!

My Pet is my co-worker
